

DIFFUSER TYPES

Prismat® The standard diffuser is a Clear Prismatic Diffuser that eliminates glare and produces an even spread of light by the female conical prism refracting properties.

WarmGlo® The option diffuser is available in both non-vented and vented models. WarmGlo Diffuser is a frosted white translucent diffuser that eliminates glare and produces a bright light that is softened for visual comfort.

VENTILATION TYPES

Non Vented

The skylight has no ventilation system. This is the standard skylight and is used in most rooms.

Passive Ventilation

The frame under the dome is perforated, this allows for hot air to naturally rise, taking with it steam and odors are drawn outside. Only available in 400mm.

MANUFACTURE

Flashing and Frame

Shown: Sunpipe Blaze with Ember Guard installed.

Sunpipe Blaze™

Sunpipe Blaze has been specifically designed for Australian bushfire areas. In place of the Standard Acrylic Dome, Laminated Safety Glass is provided to give a non-combustible lining to the roof to repel burning bushfire embers.

RAY ATTRACTOR

Skyspan Sunpipe products feature a MIRO-SILVER® Ray Attractor band at the top of the shaft. With a mirror like reflective surface of 98% light reflectivity this catches the sun's rays and bounces them down the shaft. The Ray Attractor is most effective at low sun angles of morning and afternoon, allowing daylight to illuminate your rooms for extra hours each day.

Sunpipe Flex

The Skyspan Sunpipe Flex skylights is one of the most economical and cost effective ways of utilising nature's gift and providing natural light and ventilation to any room. The highly reflective flexible shaft carries natural light directly to your room providing an atmosphere of freshness and vitality.

The flexible shaft eliminates the need for a costly light shaft construction and gives the ability to navigate around obstructive roof structures or resolve the complication of the ceiling penetration not directly aligning with the roof penetration and thereby saves both time and money.

- One-piece leakproof flashing
- High performance – more light with less heat
- Ray attractor refracts low level light increasing efficiency
- Australian made quality

INCLUSIONS

- Skylight Dome
- Flashing
- Flexible Shaft
- Collar
- Diffuser
- Ceiling Trim

WHERE TO USE

Suitable for any room where structurally compatible.

TYPICAL INSTALLATION

Roof pitch range: 0°-45°
